## DETAILED ACTION

### *Election of Species*

1. This application contains claims directed to the following patentably distinct species:

- **Species A:** represented by Figure 1.
- **Species B:** represented by Figure 2.
- **Species C:** represented by Figure 3.
- **Species D:** represented by Figure 4.
- **Species E:** represented by Figure 5.
- **Species F:** represented by Figure 6.
- **Species G:** represented by Figure 7.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no generic claim.

3. Applicant is advised that the reply to this requirement to be complete must include both, a chosen invention and an identification of the species that is elected consonant with this requirement. With respect to the identification of the species that is elected, Applicant must also include a listing of all claims readable on the elected species, including any claims subsequently added either in response to this Office Action or in any future amendment. An argument that a

claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

8. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is advised that the reply to this requirement to be complete must include an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Note: A telephone communication was not made because the requirement for this restriction is complex and the examiner knows from past experience that an election will not be made by telephone (see MPEP § 812.01).
